

INNOCENT JOHN KIWOLY

Software & DevOps Engineer | *React, Flutter, Django · Docker · Kubernetes · CI/CD* | Remote-Ready
ikiwoly@gmail.com | kiwoly.tlms.live | github.com/KIWOLY | linkedin.com/in/innocent-kiwoly-35b8b1355 | Dar es Salaam, Tanzania

PROFESSIONAL SUMMARY

I am a Software & DevOps Engineer who builds and deploys web applications from start to finish. I build backends using Django and REST APIs, create frontends with React and Flutter, and deploy everything to the cloud using Docker, Kubernetes, and Oracle Cloud. I set up automated pipelines (CI/CD) with GitHub Actions so that code goes live without manual work. I have worked with an international team across 9 countries in Belgium, and I have mentored 20+ developers in Tanzania. I am looking for remote freelance work where I can help teams build and ship software reliably.

TECHNICAL SKILLS

DevOps & Cloud: Docker, Kubernetes, GitHub Actions CI/CD, Nginx, Oracle Cloud (OCI), Terraform (IaC), Linux Server Administration

Backend & APIs: Python, Django, Django REST Framework, REST APIs, JWT Authentication, GraphQL

Frontend & Mobile: React, JavaScript, HTML5, CSS3, Flutter (Dart)

Database: PostgreSQL

Tools & Practices: Git, GitHub, Agile Collaboration, Infrastructure as Code, System Architecture Design

PROFESSIONAL EXPERIENCE

Student Coordinator — Tech Mentor

Nov 2024 – Present

ByteUjamaa Organization | Remote & On-Site

- Lead technical training sessions on full-stack web development and DevOps fundamentals for 20+ early-career developers.
- Mentored 15+ students in building and deploying full-stack applications using Django, React, and Flutter — 8 students successfully deployed live projects.
- Guided learners on production deployment strategies, Git workflows, and software engineering best practices.
- Fostered a collaborative learning culture, significantly improving technical confidence and competency among peers.

Hardware & Infrastructure Developer

Feb 2025 – May 2025

Blended Intensive Programme (BIP), Belgium | International Collaboration

- Collaborated with an international team spanning 9 countries to design and deploy a real-world hardware-software system.
- Implemented an IoT data pipeline integrated with cloud infrastructure for real-time monitoring and data processing.
- Deployed and configured network gateways ensuring reliable communication across distributed system components.
- Contributed to system architecture decisions and deployment workflows in a cross-border engineering environment.

KEY PROJECTS

ClickMart — Cloud-Deployed E-Commerce Platform | cognitech.tlms.live | github.com/KIWOLY/e-commerce

- Built a full-stack e-commerce platform with Django backend and React frontend, featuring secure JWT authentication and a scalable REST API architecture.
- Containerized with Docker and deployed to Oracle Cloud Infrastructure with Nginx, SSL certificates, and a fully production-hardened environment.
- Implemented a complete CI/CD pipeline via GitHub Actions for automated testing, building, and zero-downtime deployments on every push.

Appointment Management System | github.com/ByteUjamaa/Appointment

- Developed a scalable multi-sector scheduling system targeting education, healthcare, and government use cases.
- Designed RESTful API structure and backend logic for efficient booking, conflict detection, and schedule management.
- Built for easy containerization and cloud deployment, following production-ready software architecture principles.

Cloud-Native DevOps Portfolio | kiwoly.tlms.live

- Building a personal portfolio application demonstrating DevOps maturity: Docker, Kubernetes orchestration, and full CI/CD automation.
- Provisioning infrastructure on Oracle Cloud using Terraform for repeatable, version-controlled deployments.
- Implementing scalable, production-grade architecture as a live demonstration of end-to-end DevOps proficiency.

EDUCATION

Bachelor of Science in Information Systems Management

Expected 2026

Ardhi University, Dar es Salaam, Tanzania

CERTIFICATIONS

- DevOps Engineering Course — Udemy (Docker, CI/CD, GitHub Actions, Nginx, Cloud Deployment) | Jan 2026

CORE COMPETENCIES

Problem Solving & Analytical Thinking | Team Collaboration & Cross-Cultural Communication
Technical Mentorship & Leadership | Self-Learning & Adaptability | Remote-First Work Culture
