

INNOCENT JOHN KIWOLY

Software & DevOps Engineer | Full-Stack Developer (Django, React, Flutter) | Remote-Ready
ikiwoly@gmail.com | github.com/KIWOLY | linkedin.com/in/innocent-kiwoly-35b8b1355 | Tanzania

PROFESSIONAL SUMMARY

Results-driven Software & DevOps Engineer with proven experience building and deploying scalable, production-ready applications. Specializes in end-to-end delivery — from architecting robust backends (Django, REST APIs) and modern frontends (React, Flutter) to containerizing and automating deployments on cloud infrastructure (Docker, Kubernetes, Oracle Cloud).

Experienced in CI/CD pipeline design (GitHub Actions), infrastructure-as-code (Terraform), and Linux server administration. Demonstrated success in international collaboration (Belgium BIP 2025) and technical mentorship. Actively seeking remote opportunities where I can contribute to innovative, high-impact engineering teams.

TECHNICAL SKILLS

DevOps & Cloud: Docker, Kubernetes, GitHub Actions CI/CD, Nginx, Oracle Cloud Infrastructure (OCI), Terraform (IaC), Linux Server Administration

Backend & APIs: Python, Django, Django REST Framework, REST APIs, JWT Authentication, GraphQL

Frontend & Mobile: React, JavaScript, HTML5, CSS3, Flutter (Dart)

Database: PostgreSQL

Tools & Practices: Git, GitHub, Agile Collaboration, Infrastructure as Code, System Architecture Design

PROFESSIONAL EXPERIENCE

Hardware & Infrastructure Developer

Feb 2025 – May 2025

Blended Intensive Programme (BIP), Belgium | International Collaboration

- Collaborated with an international team spanning 9 countries to design and deploy a real-world hardware-software system.
- Implemented an IoT data pipeline integrated with cloud infrastructure for real-time monitoring and data processing.
- Deployed and configured network gateways ensuring reliable communication across distributed system components.
- Contributed to system architecture decisions and deployment workflows, gaining exposure to cross-border engineering practices.

Student Coordinator — Tech Mentor

Nov 2025 – Present

ByteUjamaa Organization | Remote & On-Site

- Led technical training sessions on full-stack web development and DevOps fundamentals for early-career developers.
- Mentored students in building and deploying full-stack applications using Django, React, and Flutter.
- Guided learners on production deployment strategies, Git workflows, and software engineering best practices.
- Fostered a collaborative learning culture, significantly improving technical confidence and competency among peers.

KEY PROJECTS

Cloud-Deployed E-Commerce Platform (ClickMart)

Live: cognitech.tlms.live | github.com/KIWOLY/e-commerce

- Full-stack e-commerce platform built with Django (backend) and React (frontend), featuring secure authentication and a scalable API architecture.
- Containerized with Docker and deployed to Oracle Cloud Infrastructure with Nginx, SSL certificates, and a production-hardened environment.
- Implemented a complete CI/CD pipeline via GitHub Actions for automated testing, building, and deployment.

Appointment Management System

github.com/ByteUjamaa/Appointment

- Developed a scalable multi-sector scheduling system targeting education, healthcare, and government use cases.
- Designed RESTful API structure and backend logic for efficient booking, conflict detection, and schedule management.
- Built for easy containerization and cloud deployment, following production-ready software architecture principles.

Cloud-Native DevOps Portfolio (In Progress)

- Building a personal portfolio application demonstrating DevOps maturity: Docker, Kubernetes orchestration, and CI/CD automation.
- Provisioning infrastructure on Oracle Cloud using Terraform for repeatable, version-controlled deployments.
- Implementing scalable, production-grade architecture to serve as a live demonstration of end-to-end DevOps proficiency.

EDUCATION

Bachelor of Science in Information Systems Management

Expected 2026

Ardhi University, Dar es Salaam, Tanzania

CERTIFICATIONS

- DevOps Engineering Course — Udemy (Docker, CI/CD, GitHub Actions, Nginx, Cloud Deployment) | Jan 2026

CORE COMPETENCIES

Problem Solving & Analytical Thinking | Team Collaboration & Cross-Cultural Communication |
Technical Mentorship & Leadership | Self-Learning & Adaptability | Remote-First Work Culture
